# THE MISSOURI MINER.

Missouri School of Mines and Metallurgy, Rolla, Missouri.

Vol. 5, No. 31.

Saturday, April 19, 1919.

Price, 7 cents.

## RESULTS OF THE GOLF TOURNAMENT.

In the golf tournament which took place last week, Stubbs won first prize, "Kid" Wilson second, "Kit" Morris third. Fourth place was a tie between M. F. Faulkner and Shore. They split the prize of a half dozen golf balls, not playing off the tie.

Coach Sermon selected 100 as the bogie. The following net scores were made: Weigle, 109, Hughes 109, Webb 118, Shore 98, Major Wild 94, "Kid" Wilson 99, Morris 101, Faulkner 102, Stubbs 101, Donahoe 104, W. R. Gettler 105.

Many of the men started, but failed to finish the round, thus disqualifying. As a whole, the tournament was successful in arousing interest, and should pave the way for greater activities in this branch of sport next year. During the coming months there will be a reorganization of the golf interests, in which the school will again take over the management of the golf course. The townspeople, however, will have all the privileges of the students for a nominal sum, probably fifteen dollars a year. This will also entitle the families of members to play. In this way it is hoped that the school and town will be brought more closely together in the sporting field.

## LIBRARY BOOKS DUE.

All books now out are considered due on Wednesday, April 23, 1919, and should be returned not later than that date. Books which are not returned or renewed by April 23 will be liable to the usual fine on overdue books.

## LIEUT. HATCH LEAVES ROLLA.

Lieut. L. C. Hatch has received orders transferring him to Columbus Barracks at Columbus, Ohio. He left Rolla Friday. Lieut. Hatch came to Rolla last July with the first detachment of soldiers at the School of Mines. He has been on duty here ever since. He assisted in training two detachments of soldiers, most of whom saw service in France. He was then assigned to duty with the S. A. T. C. (Student Army Training Corps at M. S. M. His genial and courteous manner on all occasions was won Lieut. Hatch many friends, and he stands in high favor at Rolla. He is the last one of the officers of the training camp to leave Rolla. His friends wish him God speed at his new post of duty.

## A PROSPECTIVE TENNIS MATCH WITH McKENDREE.

When McKendree College comes to Rolla to play baseball Thursday and Friday, they will bring a tennis team with them. Coach Sermon expects by that time to have a representative team picked from the school. All men interested in tennis should be out on the court now, as the team will be picked early next week. If you can play the game come out, and we will win two matches that day.

The chemistry department is rejoicing over its latest member Miss Ethyl Amino Benzine Dunlap, otherwise known as Margaret Helen. The Miner wishes to extend its heartiest congratulations.

## MISSOURI ATHLETE BEST SHOT-PUTTER IN U. S. ARMY.

An athlete from a Missouri college has proven himself the best shot-putter in the United States army, and has been selected to compete in the great athletic meet to be held in Paris in June.

This man is W. C. Maxfield, better known to his friends as "Pete.," a giant who attended school in Kirksville and played on the whirlwind football team which represented the American School of Osteopathy in the

season of 1916-17. He made many spectacular plays that year, but the crowning one was when, playing at Rolla against the School of Mines, he kicked goal from placement on the 57-yard line.

There is no telling what he would have done the next year if he had remained in school. But he heard his country's call and enlisted. He became a lieutenant in the tank corps of the United States army, served in

France and was on the eve of returning to the United States when he received orders to go to Nice, Italy, and train for the Pershing meet.

Before entering the American School of Osteopathy, Maxfield had made a name for himself as a shot-putter for LaFayette College and the New York Athletic Club.

He won the Junior championship of the United States about 1914, when he put the 12-pound shot 53 feet 4 inches—a record which has not since been equalled. In 1916 in the Senior championship contest, he put the 16-pound shot 46 feet 8 inches, which was second only to Pat McDonald, champion of the world.

The "Pershing Olympics" near Paris, under the auspices of the American Expeditionary Forces. It will, however, be open to men who have seen service in any of the Allied military forces between August 4, 1914 and November 11, 1918.

Here Maxfield is expected to make his mark, and then he will be ready to come back home and attend school in Missouri again.

#### THE LEAGUE OF NATIONS.

##### What Do You Know About This Question of National Policy?

##### M. S. M. Library Can Inform You.

The League of Nations, now under discussion at the Paris Peace Conference, which President Wilson says must be included in the terms of peace, is probably the most important matter of foreign policy that the people of America have ever had to consider; and at the same time it is one about which the average citizen knows little.

Why must a League of Nations be embodied in the Peace

terms? Why should not the Peace Terms be settled first, and the League of Nations organized afterward? Why has a majority of the U. S. Senate declared themselves in opposition to considering the League of Nations as part of the terms of Peace? Is it true that Great Britain is to have five votes, and America only one? What relation has the proposed League to the Monroe Doctrine, to Japanese immigration, to our maintaining a large standing army in Germany, in Russia, and in Armenia? How will it affect our relations with Mexico?

Have **you** considered these questions? No one has the right to challenge the honesty or sincerity of another's views, either for or against the League, unless he has studied it and informed himself on the many aspects of this great question. You share responsibility for the policies of the United States. Your children will hold you responsible for the benefits or the burdens of a foreign policy in whose adoption your intelligent interest or your careless indifference were a factor.

The Library at M. S. M. has a great deal of interesting literature both in favor of the League and in opposition to it. The following are a few of the many articles which are available for you to read and study this question which has aroused so much comment and discussion:

##### General Information.

Constitution of the League of Nations, text published by the World Peace Foundation.

Joint Debate on the Covenant of Paris, by Senator Lodge and President Lowell, of Harvard University.

Selected Articles on a League of Nations, by E. H. Phelps.

The League of Nations, Its Supporters, Its Opponents, and

Helen: "I heard you out there. What was it Jack said just before leaving that tickled you so?"

Gertrude: "It wasn't anything he said, dear."

—Judge.

Frosh: "Have you read 'Freckles?'"

Co-Ed: "No; that's just my veil."

—Froth.

"Did you have a good time last night?"

"Huh, I spent seventeen dollars, and when I said good night she called me Mister."

—Punch Bowl.

Their meeting it was sudden.  
Their meeting it was sad.

She gave her sweet young life away,

'Twas all the life she had.  
And so beneath the willows  
She's gently sleeping now.

Oh, there's always something happens

When a freight train meets a cow.

He: "Do you mind if I smoke?"

She: "Yes; I just hate the taste of tobacco."

—Jack O'Lantern.

"Did you hear about Ethel's accident?"

"No; what happened?"

"She got up to turn on the heat this morning, and the radiator."

"She called me a worm."

"Possibly she saw a chicken pick you up."

—Yale Record.

English Prof.: "What do you think of the 'Wheels of Chance?'"

Soph: "I don't gamble, sir."

**CADET OFFICERS APPOINTED.****General Orders No. 2.**

Headquarters R. O. T. C., Missouri School of Mines, Rolla, Mo., April 12, 1918.

1. In accordance with paragraph 10, General Orders No. 49, War Department, 1916, the following appointments are hereby made in the Corps of Cadets of the Missouri School of Mines for the remainder of the college year 1919, the same to take effect at once:

To be Cadet Captain, J. P. Colbert.

To be Cadet Lieutenant, K. W. Booker and J. A. Smith.

To be Cadet First Sergeant, H. J. Mutz.

To be Cadet Sergeants, A. D. Hahn, B. Rixleben, E. M. Guy, G. S. Norville, C. P. Burford.

To be Cadet Corporals, J. C. Salmon, Jos. Wilson, B. Nudleman, S. N. Shanfeld, V. I. Keeter, M. C. Ross, S. L. Nevedomsky, F. W. Smith.

To be Supply Sergeant-Cadet Sergeant, A. D. Hahn.

MAJ. H. J. WILD,

Engineers, U. S. A.,

Major Engineers, U. S. Army, Commanding.

Mrs. William Guest, of Bartlesville, Okla., arrived last Friday to visit her parents, Joseph Denton and wife, in this city. Mr. Guest graduated from M. S. M. in 1917. He has since been chemist for the National Zinc Co., at Bartlesville. Mrs. Guest will return to her home the last of this week.

Corporal H. E. Spickard, '18, who has been working in the water analysis laboratory at Paris, is attending college at the University of Lyon, Lyon, France.

K. F. Hansen, '18, is assistant chemist, American Zinc and Chemical Co., Longeloth, Pa.

**THE SENIOR TRIP.**

About 8 o'clock on Monday, April 7, the Seniors in conjunction with the Junior Chemists began to come in from the tall timbers and congregate in the lobby of the Marquette Hotel. They left the hotel in two sections, one in charge of Prof. Clayton, and the other in charge of Prof. Mann, and took the interurban for Alton, Ill., where they spent the morning learning the intricacies of lead smelting. At noon a raid was made on a small store near the smelter, and the class filled themselves on pie and milk. After this fine feast the classes left Alton for East St. Louis, where they spent the afternoon in the smelter of the Granby Zinc Co. The trip of inspection thru this company's plant ended the first day's program.

The censor of the press will no permit a publication of the evening programs, so what the

class did on Monday evening and those following must always remain a secret.

On Tuesday the Laclede-Christy Clay Products Co., The Scullin Steel Co., and the National Lead Co., were visited, and at nine o'clock in the evening the class left for Ironton, Mo. While on the train bound for Ironton a "half shot" gentleman having heard Prof.

Clayton address Dr. Cox as "Doctor," gently tapped Prof. Clayton on the shoulder, and asked him if that gentleman was a doctor. Prof. Clayton nodded his head; and then the "half shot" gentleman touched Dr. Cox and motioned for him to walk out on the car platform, and then whispered in Dr. Cox's ear if he could cure him of such-and-such a disease.

All of Wednesday was spent on Pilot Knob and Shepherd Mountains studying the geology of the iron deposits. It was on Pilot Knob that Dr. Cox asked Fred Moore what kind of a rock a certain one was, and Fred answered, "Oh, that's a Poosoconglomerate."

Thursday was consumed studying the granite at the Graniteville Quarries, and the geology in the vicinity of the "shut-in" near Arcadia. It was at the latter place where "Kit" Morris failed to find the long-sought-for dike.

Friday and Saturday were spent at Mine LaMotte and at the Missouri Cobalt Co.'s plant at Fredericktown. At Mine La Motte was a striking example of how money can be uselessly spent around a mine; it is needless to say the company is now in the hands of a receiver. The class went underground Saturday morning at Fredericktown, and after the dozen embryo mining engineers had spent a couple of hours wading in knee-deep water while wearing ordinary shoes. Many utterances could be heard to the effect, "I

believe I will be a geologist," or "I want to be a millman," etc.; not a one said he was going to be a mining engineer.

Sunday morning was spent in Fredericktown, and Sunday afternoon at Flat River. Sunday afternoon the class took a ten-mile hike studying the geology of the Flat River district as best they could while passing by at a terrific walking speed.

Monday was spent in the mill of the Federal Lead Co., and Tuesday in the Doe Run Lead Co. mill, and in the exceedingly well constructed Federal No. 4 mill.

The remainder of the week was spent surveying in one of the Federal Lead Co.'s mines.

Those taking the entire trip were Nolte, Larsh, John Morris, T. C. Morris, Moore, Benton, Bohart and Dowd. Those taking the entire trip excepting the mine surveying were Crawford, Schnaidt, Gill and Prof. Mann. Prof. Clayton and Dr. Cox took the first week of the trip. Prof. Forbes took the last week, and Prof. Burkhardt the last four days.

**Notes of the Trip.**

"Kit," Gill and "Boots" are making arrangements to lease the bowling alleys opposite Hotel Statler. Ask them why?

Fred Moore wants to know the difference between Lignite and Charcoal.

Dr. Cox, when he alighted from an auto at Bismarck, was taken for President Wilson traveling in disguise.

Prof. Clayton sat with a negro woman in a street car.

Bill Nolte received two letters a day from Rolla. One of the professors did also.

Benton cracked his shins at Pilot Knob.

Dowd, Benton and Gill fell for the Fredericktown beauties.

John Morris has decided he is no mountain climber; 'Boots' probably has decided likewise.

What Is Peace Worth To You? A Victory Liberty Note Is A Note Of Joy And Profit.

This Space Contributed by the Loyal Students of the School of Mines.

## SOPHOMORE.

Dear Friend Al:

It has been a long time since I last wrote you about the Sophomore Klass, so as I have got some extra time I will take my pen in hand to tell you about them. Since I started this I find that I ain't got no ink, so I guess I write to you about taking my pen in hand—I took a pencil. There hasn't been much going on around here since St. Pat's. Abner Hahn got married last Thursday night, and the students entertained him with a shiver-ree. A whole bunch of fellows went down to the place where he got married, and that they was going to have a lot of fun out of him, cause they thought he was awful nervous. The reason they thought he was nervous was because he told one of the professors that he was, he wrote on his paper that he couldn't do very much because he had something on his mind he had better get it off. Some of the fellows saw his paper, and they thought it was a good joke & you ought to have saw them laugh. I guess he got his mind alright cause he seems to be alright in class now.

A lot of fellows was arguing the other day about what the shortest poem in the world was. They said it was "Jesus wept." but I told them they was wrong because it didn't rhyme and if it was a poem it had to rhyme, so they ask me what the shortest poem was. I told them I didn't know, but I could make up one for them, and they said yes here you so I said

"July first

Awful thirst."

and they laugh and said they guess I was right. A lot of fellows are making up poems about this hee probishun now days so I've made up another that I am going to tell you & after you learn it by heart you can tell it to some other fellow just as if you made it up yourself and then they

will think you are smart cause maybe they don't know you very well and they won't be any different then Here it is:

"They tell me this here probishun Is good for your face and for fish;

That countless blessings ooze and owe

From flirting with the H<sub>2</sub>O.

And highballs made of rain and dew

Are very good for me and you

Well, maybe so,

I dunno.

Prof. Deen is pretty busy teaching calculus to get near every body in school now days & he don't have much time to tell many jokes in class but I guess he pulled a pretty good one the other day, he said "The simplest way to make an X-rays is to borrow a 10 bill." I guess that is a pretty good one ain't it? The other day Prof. McCandless was telling us why we used a certain formula he gave us and he said "all the best people do it that's why we do it," so I guess we are getting to be pretty high-class ain't we all. When anybody says that these Miners are a bunch of raw guys you tell 'em it ain't so cause we do what the best people do and the best people means society people and if we do what they do why we are best people too ain't we Al? We are going to show them some real class round here commencement week Al; I ain't just saying it either Al, I mean it. We are going to have a show and a dance and a whole lot of other things and they want all the fellows that used to go to school here and those that graduated from here to come back and have a good time just like when they was in school before.

Well Al I guess I can't write no more for this time so will stop. I'll write you again some time when ever there is something going on to tell you about it.

Your old friend

OLIVER.

**WHY ARE WIDOWS POPULAR?**

Ever since the days of Ruth widows have been popular. And of all widows "college widows" have received the lion's share of popularity. The reason for this has been a closely guarded secret. But on the evening of Thursday, April 24, at Parker Hall, the citizens of Rolla will have the opportunity of seeing a cast of thirty people solve the great mystery. The same management which so ably produced "The Girl He Left Behind" takes pleasure in presenting their newest and most clever comedy, "The College Widow." Rolla is, indeed, fortunate in getting this play, for not only is the play an intimate insight into college life, but is a theatrical achievement of which Broadway is proud. It will, without doubt, be the largest and best production that this city has ever seen.

**LIBRARY HOURS DURING COMMENCEMENT WEEK.**

The Library will be open the usual hours on Monday. It will be open until 6 p. m. the remainder of the week, except on Saturday, when it will close at noon. The Library will be closed during Ball Games or other activities of Commencement Week.

**PREACHING AT THE PRESBYTERIAN CHURCH.**

First Lieutenant Harry H. Koontz, of Camp Taylor, will conduct the Easter services at the Presbyterian Church next Sunday. Lieutenant Koontz is a man of originality and varied experiences. Do not fail to hear his message Sunday. Students and soldiers are especially invited. Special Easter music.

H. R. Hanley, '01, is superintendent Electrolytic Zinc Plant, U. S. S. R. & M. Co., Kennett, California.

Kyllburg, Germany, March 24, 1919.

The 1919 Rollamo Board.

Dear Sirs:

Your letter of Dec. 24th just reached me today, after chasing all over the A. E. F., as I had transferred from the Infantry, and had failed to let the school know.

Enclosed is the "dope" for the school record, which you asked for. I'm sorry it's late, but it was unavoidable.

At present I am at Kyllburg Regimental Headquarters anxiously waiting to go home. We expect to sail in May, and everybody wants to get away from this job of "occupying."

I have heard very little about the old Rolla men except those in this regiment, Dennie, Ebmeyer, Thomas, Forman and myself. You know, no doubt, that "Pop" Shriver was wounded in the Argonne-Meuse drive.

Hoping you have a big success with this year's book, and that the old school is bigger and better than ever, I remain,

Yours sincerely,

MSTR. Eng. T. C. SHERWOOD  
JR., Reg. Hq. 314th Engrs.,  
A. P. O. 761, A. E. F.

Thursday night Rolla was enlivened by an informal dance at the Maxine Cafe. Victrola music and refreshments were served a la carte.

Of the twenty-five members of the A. I. M. E. listed in the April Bulletin as died in service, two, Martin Bowles and Norman Ohnsorg, were M. S. M. men.

Ralph E. Barker, '98, recently with the Garfield Smelting and Refining Co., has accepted a position with the Tacoma Smelter, Tacoma, Wash.

H. K. Sherry, '12, is superintendent Johns-Manville Co., Asbestos, Que.
